Computer Science student at UFPB and a developer focused on **AI agents, automation and software engineering**. I am the **dev lead** of NextAct's agent pipeline, now in production with 10+ partners, and I founded Connecta CI, an innovation consultancy that has reached 30+ companies. Author of a peer-reviewed paper at CSBC 2025. Interested in taking systems from paper to production.

EXPERIENCE

- Co-founder and Dev Lead** *NextAct* May 2026 – Present
- The first *Open Talent Agency* for C-Level executives in career transition; operating with 10+ partners.
 - Architected and implemented the 5-layer AI agent pipeline: interview agents capture the executive's tacit knowledge, which is then structured, enriched and orchestrated with *human-in-the-loop* until it becomes a deliverable product.
 - Combined full stack development with low-code automation (n8n) so the system runs autonomously, with human review checkpoints at the highest-risk steps.
 - Wrote the entire operational documentation of the pipeline, including the interactive architecture of the 5 layers, allowing new partners to join the operation without depending on the founders.
- Founder** *Connecta CI* Aug 2025 – Present
- A student startup ecosystem at the UFPB Informatics Centre, now positioned as an innovation consultancy, having reached more than 30 companies.
 - I lead the AI agents and innovation consultancy fronts; previously I ran the financial strategy (planning, expense control, and securing sponsorships and partnerships).
 - Led an organisational restructuring, reducing the team from 30 to 15 members through a structured evaluation framework, gaining focus and delivery.
- Scholarship Holder** *Tutorial Education Program (PET) Computing - UFPB* Dec 2024 – Present
- Scholarship holder since Nov 2025 (volunteer from Dec 2024 to Nov 2025), with 3 papers published at PET group meetings.
 - Active across the teaching, research and extension tripod, with event organisation and content production.
- Builder** *Crew of Builders* Oct 2025 – May 2026
- Built AI agents alongside the community and started the “CV of the Future” project, which evolved into NextAct.
- Teacher** *ML Ensino Individualizado* Sep 2024 – May 2026
- Around 20 students taught; voted “Best Teacher of the Semester” twice.
- Teaching Assistant** *Universidade Federal da Paraíba* Jan 2025 – Dec 2025
- Teaching assistant for Applied Logic for Computing; mentored more than 100 students and recorded support classes under faculty supervision.
- Software Engineer** *IEEE CS and CIS Chapter at UFPB* Apr 2024 – Aug 2025
- Developed projects in partnership with other groups in the chapter, including the AI Bridge 2024 event.
- Founder and Advisor** *Assessoria e Mentoria Ajuda Enem* Apr 2023 – Jan 2025
- Founded an online educational advisory service at 17, responsible for marketing, financial control and team management; 6 mentees and 5 admissions.

PROJECTS

- **ScorePredictor — football result prediction:** a statistical analysis and prediction system built on logic programming. Prolog, HTML5, CSS, JavaScript and Data Analysis.
- **TaxCalcBR — financial system for interest rates:** a web application that simplifies calculating financial investments by consuming indicator APIs. Python, APIs and Web Development.

EDUCATION

- B.S. in Computer Science** *Universidade Federal da Paraíba* Dec 2023 – Dec 2027
- Relevant coursework: Data Structures, Applied Logic, Artificial Intelligence, Operations Research, Software Engineering and Statistics.

ACHIEVEMENTS AND PUBLICATIONS

- **Peer-reviewed paper at CSBC 2025**, the largest Computing conference in Latin America: *Score Predictor: Predição de Resultados no Futebol Usando Programação Lógica* (VI Brazilian Logic Workshop).
- **Bronze Medal** at the Paraíba Informatics Olympiad (OPI): 3rd place at UFPB and 9th in the state of Paraíba.

SKILLS

- **Core:** AI agent development, Python, Software Engineering, C, C++, Java, Prolog, SQL (MySQL), Git and GitHub.
- **Also:** n8n, FastAPI, Flask, React, Node.js, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Figma and Canva.
- **Languages:** Native Portuguese; professional working proficiency in English and Spanish.
